

The Journal of

Membrane Biology

An international journal

**for studies on the structure, function and genesis
of biomembranes**

Volume 99 1987

Editorial Board

W.R. Loewenstein, Miami, Editor-in-Chief

Q. Al-Awqati, Columbia

G. Blobel, Rockefeller

D. Branton, Harvard

P. Cuatrecasas, Glaxo

J.M. Diamond, California, L.A.

D. Engelman, Yale

S. Fleischer, Vanderbilt

J.G. Forte, California, Berkeley

G. Guidotti, Harvard

J. Handler, N.I.H.

D.A. Haydon, Cambridge

A. Helenius, Yale

L. Heppel, Cornell

W.L. Hubbell, California, L.A.

R.B. Kelly, California, S.F.

A. Klug, Cambridge

P. Läuger, Konstanz

S.E. Luria, MIT

E.A.C. MacRobbie, Cambridge

V.T. Marchesi, Yale

D.J. Fritts, Assistant to the Editor

H.M. McConnell, Stanford

S. McLaughlin, SUNY, Stony Brook

I. Mellman, Yale

C. Miller, Brandeis

H. Murer, Zurich

Y.A. Ovchinnikov, USSR Acad. Sci. Moscow

Anatomy and Embryology

This journal publishes original articles on anatomy, neuroanatomy, histology, morphological endocrinology and embryology of vertebrates and, especially, of man. In recent years, particular emphasis has been placed on embryological work and on studies contributing to our knowledge of the structure and development of the central nervous system. The publications are based on a wide range of methods reaching from macroscopical and light microscopical techniques to electron microscopy and stereology. - Great efforts are being made to achieve the highest possible standards in the printing of illustrative material and to publish concise contributions within a few months after acceptance.

Subscription Information

ISSN 0340-2061 Title No. 429

1985, Vols. 171-172 (3 issues each): \$365.00

1986, Vols. 173-174 (3 issues each): \$451.00

Cell and Tissue Research

Cell and Tissue Research presents to its readers significant advances encompassing a broad field of cell biology and microscopical anatomy. The journal deals with investigations on diverse organisms ranging from invertebrates to mammals, including man. Emphasis is placed on the comparative aspects in cell biology.

The following facets are given particular consideration: ultrastructure of cells and tissues; neurohistology, including sensory organs; morphological neuroendocrinology; micro-anatomy of endocrine, reproductive, digestive, and lymphatic systems. These studies are based on a wide spectrum of modern methods.

The editors and publishers of this international journal have set as their goal rapid processing of the manuscripts with the highest standards attainable for reproduction of the illustrative material.

Subscription Information

ISSN 0302-766X Title No. 441

1985, Vols. 239-242 (3 issues each): \$1175.00

1986, Vols. 243-246 (3 issues each): \$1290.00

Histo- chemistry

Histochemistry publishes original papers dealing with problems in all areas of cyto- and histochemistry. Special emphasis is placed on theory and methodology (including fractionation and homogenization techniques; autoradiography, polarization optics, fluorescence microscopy). Papers on applied cyto- and histochemistry which serve to illustrate methods are also published, as are those which help advance the understanding of molecular processes in the organism and the interrelationship of cells and their individual parts.

Subscription Information

ISSN 0301-5564 Title No. 418

1985, Vols. 82-83 (6 issues each): \$526.00

1986, Vols. 84-85 (6 issues each): \$564.00
